	Examiner JAMES R. BRITAIN	Art Unit 3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The substitute specification received July 19, 2006 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 49, 51-54 and 56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pilie et al. (US 4485534) in view of Meager (US 2002/0184740).

Pilie et al. (figures 1-3 and 5-12) teaches both the article and method for opening and closing two enclosures, one being a room and the other a garment, each with an opening and each with first and second coupling fasteners in the form of zippers with teeth 11, 12, 13, 14 and two sliders 40, 45. The zippers with teeth both act as closing elements for each enclosure and as docking elements for joining the enclosures. The difference is that though it is clear that the fasteners provide some sort of sealing function given the obvious shelter compartment and protective suit, the use of sealing strips isn't clearly used. However, Meager (figure 1) teaches sealing strips usable on "hazardous material suits" or "bags" [0071] that clearly provide a sealing function as it is obviously useful to have sealing closure strips on protective garments such as that of Pilie et al. Therefore, it would have been obvious to modify the device of Pilie et al. so that sealing strips are used on enclosures since sealing strips used on protective

garments and bags are well known as evidenced by Meager. As to claims 51-53 and 56, the structure in these claims is well known and extends from the teachings of Pilie et al. and Meager.

Allowable Subject Matter

Claims 34-48 are allowed.

Claims 50 and 55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
